Undergraduate Education: Teacher Licensure

The Dordt College teacher education program combines theory and practice by providing classroom experience every year prior to their student teaching semester. The Teacher Preparation Program offers a wide variety of endorsement (teaching license) options to fit interests and needs.

Actuarial Credentialing

The actuarial credentialing and exam process usually requires passing a rigorous series of professional examination, most often taking several years in total. Dordt College Actuarial Science Majors take some of these classes while completing their degree.

Fundamentals of Engineering (FE)

The Fundamentals of Engineering (FE) exam is generally the first step in becoming a professionally licensed engineering. The test is designed for recent graduates and for students who are close to finishing an undergraduate degree from an EAC/ABET-accredited program.
